

HELLODOC 5.60

MODIFICATION DE L'APPARENCE

HelloDOC 5.60 propose une série de skins permettant d'habiller l'interface de l'application au goût de chacun.

Ce paramétrage est accessible par le menu Outils/Option, rubrique Apparence :

On voit ainsi que les thèmes classiques de Microsoft peuvent être repris au goût de chacun :

Microsoft Office 2000

Microsoft Office XP

Microsoft Office 2003

Il est également possible d'appliquer ses propres couleurs parmi un choix de plus de 16 millions de couleurs différentes, avec des résultats qui peuvent aller du meilleur au pire :

Cette personnalisation est accessible depuis le choix Microsoft Office 2007 en choisissant « Personnalisé » dans la liste déroulante, puis en cliquant sur la couleur proposée à droite.
